I'm a software developer who designs object-oriented, user-centric, and responsive applications that bring a business's idea to life. I leverage my technical, analytical, and problem-solving skills to write functional application code that is modular and is ready to scale. I'm able to debug my issues independently and have experience with version control in a team environment.

Skills

HTML | CSS | JavaScript | Python | React | Django | NodeJS | Express | MongoDB | PostgresQL | Github

Communication | Teamwork | Problem Solving | 100WPM Typist

Projects

921steak

github.com/REST-a-site
